📍 232 QL13, Ward 26, Binh Thanh  
District, Ho Chi Minh City, VietNam

### SKILLS

#### PROFESSIONAL SKILL

- Basic knowledge of software testing and automated testing
- Basic knowledge of JavaScript. Experience with HTML, CSS, JavaScript, and Node.js
- Proficient with databases: MongoDB (Mongoose) and SQL
- Familiar with React framework
- Exposure to C++, Python, and Java programming
- Studied: Java Application Programming, Requirements Engineering, Advanced Python, Advanced Web Developer

#### SOFT SKILL

- Soft Skills
- Presentation
- Problem-Solving
- Self-Learning
- Communication
- Teamwork
- Project Management

### INTERESTS

### OBJECTIVE

As an Information Technology student, I am seeking an internship in the fields of Backend, frontend, and Testing. This opportunity will help me enhance my skills and knowledge of React.js, HTML, CSS, and JavaScript while working on Front-End projects. Additionally, I aim to gain more experience with APIs and POSTMAN in Backend development. I also want to improve my Java skills while working as a Tester. I hope to learn professionally and contribute to the company's projects with care and a strong sense of responsibility.

### EDUCATION

#### SOFTWARE ENGINEERING

2022 - PRESENT

#### VAN LANG UNIVERSITY

- Major: Software Engineering.
- Start date: 2022-2026
- Subjects I have studied related to web and testing: Automation Testing, Software Testing, Requirements Engineering, Advanced Web Programming, Advanced Java Programming
- GPA: 3.0/4.0

### PROJECTS

#### MEMBERS

#### SHOPPING-ONLINE CLOTHING WEBSITE

2024 - 2025

Number of participants 3

### TECHNOLOGY USED

HTML, CSS, JavaScript and back-end technologies such as Node.js API

#### BackEnd,Front-End

- Gather information from customers regarding their specific requirements for the e-commerce website. This includes features such as product management, shopping cart functionality, payment processing, and user login and registration.
- Design the website interface.
- Use HTML, CSS, and JavaScript to develop the user interface (UI) according to the design specifications.
- Optimize the interface to ensure smooth and user-friendly interactions.
- Build essential features, such as product display, add-to-cart functionality, cart management, and payment processing.
- Design and implement APIs to interact with the database and provide data to the front end.
- Handle client requests, such as adding products to the cart, processing payments, and managing user accounts.

#### MEMBERS

#### TESTING THE FUNCTIONS OF KIOTVIET WEBSITE AND CELLPHONES

2024 - 2025

Number of participants 3

### TECHNOLOGY USING

WebDriver Selenium + TestNG + POM + Read JSON & Excel files

- Selenium WebDriver – Web browser automation.
- TestNG – Testing framework, supports parallel test execution, test case management.
- Page Object Model (POM) – Design model to help manage test code for easy maintenance.
- If you want to read json and excel files in eclipse, the first step is to import the library

**read json and excel files then create a json file when the data is entered into the file and in the data**

**running program must import the correct path of the json file you want to read and similarly excel**
